Modules

TrickleStar

APS units installed in the US.

The largest volume of any vendor in the category

Our Partners

Tier 1 APS: Alive and well

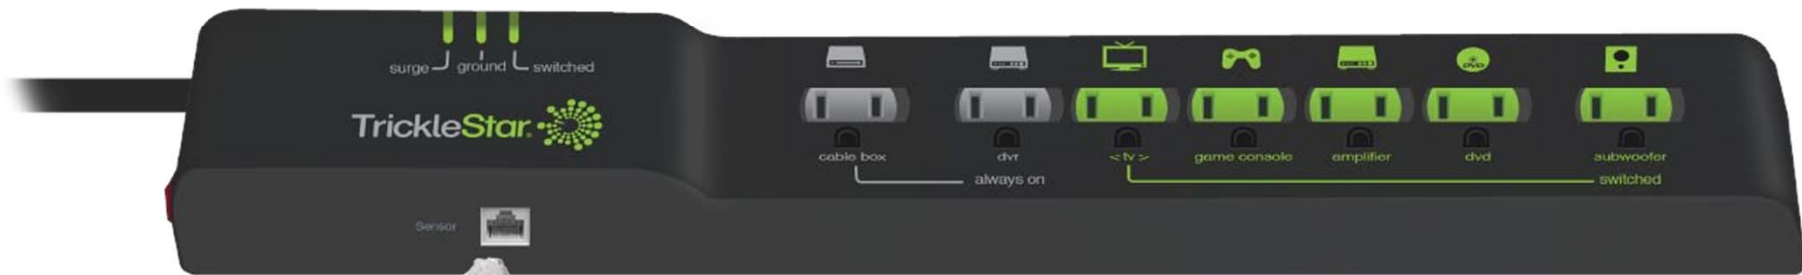

- TrickleStar Tier 1 APS units are deployed by the tens of thousands in California and hundreds of thousands annually across the US.
- Resurrected in a jurisdiction after a recent field test.
- Included in the BPA implementation manual with an incentive as a commercial measure. The NWRTF has assigned a savings value of 118 kWh annually.
- Will continue to be an extremely safe and reliable cost effective measure for the foreseeable future.
- Final stages of a pilot with a National Retailer

Tier 2 APS Plus with IR Sensor

Tier 2 APS Plus Multi-Sensor

Sony and Sharp Android TV

Say what you want to see with voice search

Spend less time browsing, and more time watching. Voice search on Android TV™ lets you search for content across different services without ever having to pick up the remote. You can also get recommendations; asking for "romantic comedies" for example, brings up a list of suitable options.

Google Cast™: Plays nice with your other devices

BRAVIA® is Google Cast™ ready so you can easily cast your favorite entertainment like YouTube™ from your personal device on to the stunning BRAVIA® screen³. You can cast from Android™, iOS™, or your laptop.
