

Arthur Hitomi

CTO & Co-Founder, Numecent

Cloudpaging for IoT* environments

CALIFORNIA PLUGLOAD RESEARCH CENTER

January 30, 2015 @ 11am
Calit2 Auditorium
University of California, Irvine

Dr. Art Hitomi is Chief Technology Officer and co-founder of Numecent. Hitomi is a recognized figure within the technology community with expertise within the areas of on-demand application delivery including application and data streaming, application virtualization, peer to peer systems, distributed workflow systems, software development methodologies, and has contributed to the development of Internet protocol standards. He is the inventor of numerous patents held by Numecent.

Prior to Numecent, Hitomi co-founded Endeavors Technologies at the University of California, Irvine as a PhD student. During his tenure at Endeavors he has been responsible for all aspects of engineering including technology, development and QA. His products have been nominated and awarded by the industry, including a finalist in the Software Development's Jolt Product Excellence and Productivity Awards.

Prior to starting Endeavors, Hitomi held both academic and industry positions as a software researcher and developer, including principal developer for a distributed learning system he implemented for Sun Microsystems. Dr. Hitomi is a graduate of University of California, Irvine with a BS with honors, an MS degree, and a PhD in Information & Computer Science.
